

## **Molecular Biology Expert in Single-Cell Therapeutics Discovery**

[Posted on 26<sup>th</sup> October 2017]

Use your molecular biology skills to advance a revolution in drug discovery with cutting edge single-cell droplet microfluidics!

HiFiBiO is a global biotech company that is rapidly expanding on three continents (US, France and China). The company identifies novel therapeutic antibodies by applying a paradigm-changing microfluidic technology platform. We are currently expanding our molecular biology capabilities by focusing the drug discovery and development efforts on translational research and single cell profiling.

Our Paris based (14<sup>th</sup> arrondissement) site, is looking for highly motivated molecular biologist expert to develop high-throughput single cell methods, molecular biology tools serving the antibody drug discovery pipeline as well as feeding our technological innovation programs. Experience in performing, controlling single-cell RNA-sequencing approaches, ideally applied in B cells immunological context is preferred. The candidate should also be knowledgeable in cell biology, disease biology, and drug discovery/development processes. Excellent presentation and communication skills are critical for this position.

For more information on HiFiBiO, visit our website at <http://www.hifibio.com>

To apply, please send the following materials to Dr. Annabelle Gérard at [a.gerard@hifibio.com](mailto:a.gerard@hifibio.com): Your CV and a cover letter explaining your reasons for applying and stating why your skills would be suitable for this job.

The position is available to start straight away.
