

Careers at HiFiBio SAS

Senior Research Associate – High Throughput Screening Assays

HiFiBio is an innovative global biotech company that is rapidly expanding on three continents (US, France and China). The company identifies novel therapeutic antibodies using its proprietary paradigm-changing single-cell microfluidic technology platform. Our therapeutic focus is on immune modulation in oncology and autoimmune diseases. We are currently recruiting a new team member as senior research associate to develop the functional assay in droplet. The position is available at Paris site.

Job Description

The Paris, French site is currently recruiting a senior research associate to develop the functional assay in droplet. This new team member will be involved on different aspects of technology development. Essential responsibilities include:

- Identify new bio-assays for antibody discovery
- Develop, validate and perform in droplet assays for internal and partnership antibody discovery programs

Successful candidates will be expected to work cross-functionally as part of interdisciplinary multi-project teams with colleagues in Cambridge, Paris, and China, as well as to interact with external CROs and collaborators.

Qualifications and Skills

- Ph.D. or MS with 2 - 3+ years industry experience in immunology and biotechnology
- Strong cell biology expertise with experience in developing and implementing cell-based assay
- Ability to plan, execute and deliver on time the experiments
- Ability to communicate results in a professional manner
- Experience with high-throughput liquid handling systems and analyses preferred
- Strong communication skills and the ability to work within a multi-disciplinary team are a must

This individual must be tenacious problem-solver and a great team player. A proactive, passionate, and well-organized individual is preferred. You should be capable of working independently to deliver quality results and interact with remote colleagues in a fast-paced startup environment. This is an impactful opportunity to play a key role in and to shape the culture of a young, dynamic, multinational innovative biotech working at the leading edge of treating immuno-oncology and autoimmune diseases.

To be considered for this role, please submit your CV and a cover letter to s.ellouze@hifibio.com with the job title in the subject of your e-mail.
