

Careers at HiFiBio SAS

Project Leader, Therapeutic Antibody Drug Discovery

HiFiBio is an innovative global biotech company that is rapidly expanding on three continents (US, France and China). The company identifies novel therapeutic antibodies using its proprietary paradigm-changing single-cell microfluidic technology platform. Our therapeutic focus is on immune modulation in oncology and autoimmune diseases. We are currently recruiting several new team members with drug discovery experience to lead our therapeutic projects. Positions are available at both our Paris, France and Cambridge, MA, USA sites.

Job Description

The Paris, French site is currently recruiting several project leaders to drive our therapeutic programs forward. These new team members will lead discovery projects. Essential responsibilities include:

- Identify and validate potential new targets for antibody discovery
- Develop a discovery and development strategy to find therapeutic candidates for HiFiBio's targets and progress them through IND filing
- Manage discovery work plan by developing and employing HiFiBio's discovery platform
- Oversee antibody leads through antibody engineering technologies
- Oversee the design and execution of studies, including cell-based assays and *in vivo* pharmacology studies, to characterize drug candidates and identify lead molecules
- Support IND filing efforts

Successful candidates will be expected to work cross-functionally as part of interdisciplinary multi-project teams with colleagues in Cambridge, Paris, and China, as well as to interact with external CROs and collaborators.

Qualifications and Skills

- PhD/MS with 5+ years industry experience in Immunology/cancer disease biology with antibody discovery expertise and project leader experience required
- Strong disease expertise with experience in development and implementing *in vitro* and/or *in vivo* pharmacology assays
- Experience with high-throughput liquid handling systems and analyses preferred
- Strong communication skills and the ability to work with a multi-disciplinary team are a must

These individuals must be tenacious problem-solvers and great team players. Proactive, passionate, and well-organized individuals are preferred. You should be capable of working independently to deliver quality results and interact with remote colleagues in a fast-paced startup environment. This is an impactful opportunity to play a key role in and to shape the culture of a young, dynamic, multinational innovative biotech working at the leading edge of treating immuno-oncology and autoimmune diseases.

To be considered for this role, please submit your resume and a cover letter to a.gerard@hifibio.com and f.dom@hifibio.com with the job title in the subject of your e-mail.
